Bhubaneswar, Odisha | Open to Relocation

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on internship experience building scalable, secure applications using Core Java, Spring Boot, React.js, REST APIs, and Microservices Architecture. Proficient in Spring Security, JWT, Hibernate/JPA, MySQL, and Spring MVC. Deployed 3+ full-stack applications supporting 100+ users with 80%+ unit test coverage. Skilled in Collections Framework, Multithreading, and Data Structures. Familiar with Docker, AWS, and CI/CD. MCA graduate (2026), seeking full-time Java Full Stack or Backend Developer roles.

TECHNICAL SKILLS

Languages: Java, SQL, C

Backend: Spring Boot, Spring MVC, Hibernate, JPA, Spring Security, JWT, REST APIs, Microservices, JDBC, Servlets, JSP

Frontend: React.js, JavaScript, HTML5, CSS3, Responsive Design

Database: MySQL, PostgreSQL

DevOps & Tools: Git, GitHub, Maven, Postman, JUnit, Mockito, Docker, AWS (EC2, S3), CI/CD

Concepts: OOP, Data Structures, Multithreading, Agile, SDLC, MVC, Exception Handling, System Design

EXPERIENCE

Java Full Stack Developer (Intern) | Seeree Services Pvt. Ltd. | Bhubaneswar | Dec 2025 – Mar 2026

- Banking backend developed using Spring Boot + MySQL, supporting 100+ users with role-based access control
- API security reinforced using JWT + Spring Security, reducing unauthorized access risk by ~85%
- 25+ REST endpoints structured for transaction workflows, improving modularity and maintainability
- Code stability maintained with 80%+ unit test coverage using JUnit and Mockito

PROJECTS

Secure Digital Banking Management System

[Live Demo](#) | [GitHub Repo](#)

Java, Spring Boot, Spring MVC, JSP, MySQL, JWT, Spring Security, REST APIs, BCrypt, JUnit

- Engineered a scalable banking system handling **100+ users**, reducing manual processing effort by **60%**
- Strengthened authentication using OTP + encrypted hashing (BCrypt), strengthening access control by **~85%**
- Developed **30+ REST APIs** for transactions and account workflows with improved response time (**~25% faster**)
- Unique Features: wallet isolation, Instant Loan System, Chatbot Support, Fraud Detection,

GreenCart – Full Stack E-Commerce Platform

Java, Spring Boot, Hibernate, JPA, REST APIS, MySQL, React.js, JavaScript, HTML5, CSS3

- Built an end-to-end e-commerce platform; optimized Hibernate/JPA queries reducing **API latency by 30%**
- Implemented multi-role flows (User/Seller/Delivery), improving scalability and feature separation
- Built responsive React.js frontend improving user engagement by **35%**

PingMe – Real Time Chat System

Java, Spring Boot, WebSocket, STOMP, React.js

- Delivered real-time messaging using WebSocket (STOMP), achieving **sub-100ms latency** across concurrent users
- Reduced message latency by **50%**; enabled auto-deleting messaging enhancing user privacy by **60%**

EDUCATION

Master of Computer Applications

United School of Business Management, Bhubaneswar | CGPA: 8.13 | 2024 – 2026

Bachelor of Science (PCM)

Bhadrak Autonomous College, Bhadrak | CGPA: 7.43 | 2020 – 2023

CERTIFICATIONS

- Cloud Computing – NPTEL
- Introduction to Internet of Things (IoT) – NPTEL
- Introduction to Generative AI – Google Cloud (Coursera)

KEY ACHIEVEMENTS

- Built and deployed 3+ full-stack applications supporting 100+ users, improving workflow efficiency by **50%+**
- Designed and documented **40+ REST APIs**, reducing backend integration time by approximately **30–35%**
- Achieved 80%+ unit test coverage, decreasing critical bugs during testing by around **40%**
- Solved 150+ Data Structures and Java problems across platforms, strengthening problem-solving and coding efficiency
