PROFESSIONAL SUMMARY

Java Full Stack Developer with MCA and professional internship experience building production-oriented Spring Boot services and React applications. Hands-on with distributed systems patterns including distributed locking, optimistic concurrency control, rate limiting, REST API design, and relational data persistence for high-concurrency workflows. Strong foundation in data structures, object-oriented programming, multithreading, system design, application security, automated testing, and Agile software development.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frameworks & Backend: Spring Boot, Spring Security, Spring MVC, JPA/Hibernate, REST APIs, JSP, Microservices

Distributed Systems & Databases: Redis/Redisson, PostgreSQL, MySQL, Distributed Locking, Optimistic Locking, Concurrency Control, Rate Limiting, Transaction Processing

Frontend: React.js, Angular, HTML5, CSS3, Tailwind CSS

Cloud & DevOps: Microsoft Azure, AWS (EC2, S3), Docker, CI/CD, Git, GitHub, Maven, Postman

Core CS & Engineering: Data Structures, OOP, Multithreading, System Design, Agile, SDLC, JUnit, Mockito, Exception Handling, Secure Coding

PROFESSIONAL EXPERIENCE

Java Full Stack Developer (Intern) — Seeree Services Pvt. Ltd.

10/2025 – 04/2026

Bhubaneswar, Odisha

- Engineered Spring Boot banking services supporting **100+ users** across core banking workflows by integrating MySQL persistence, business logic, and role-based access control.
- Secured sensitive REST operations with Spring Security and JWT-based authentication, enforcing role-based authorization across banking workflows to protect transactional data.
- Designed and integrated **25+ RESTful APIs** for account, transaction, and banking operations, creating modular backend services for dependable frontend communication.
- Strengthened service reliability with JUnit and Mockito validation, maintaining **80%+ unit-test coverage** to reduce regression risk across backend business logic while following Agile development practices.

PROJECTS

FlashReserve – High-Concurrency Ticket Reservation Engine | [GitHub Repo](#) | [Live Demo](#)

Java 17, Spring Boot, PostgreSQL, Redis/Redisson, Docker, React.js, Razorpay

- Preserved seat-inventory consistency during concurrent booking attempts by combining **5-minute distributed seat holds**, Redis/Redisson coordination, and PostgreSQL optimistic locking to prevent duplicate reservations.
- Controlled burst traffic at **10 requests/second per user** through rate limiting and coordinated booking state transitions, protecting inventory consistency during traffic spikes.
- Validated concurrency behavior with a **6-user stress race** that produced exactly **1 successful reservation and 5 conflicts**, while supporting Razorpay test payments and **30+ APIs**.

Secure Digital Banking Management System | [GitHub Repo](#) | [Live Demo](#)

Java, Spring Boot, Spring MVC, JSP, MySQL, JWT, Spring Security, REST APIs, BCrypt, JUnit

- Strengthened transaction integrity through BCrypt credential protection, OTP verification, and HMAC-SHA256 validation across sensitive financial operations.
- Automated core financial workflows including fund transfers, transaction processing, EMI reminders, fraud detection, and Razorpay payment integration.
- Delivered **30+ banking APIs** across account and transaction workflows while extending the platform with AI chatbot and biometric authentication capabilities.

DevScout AI – AI-Powered GitHub Developer Analyzer | [GitHub Repo](#) | [Live Demo](#)

Java, Spring Boot, React.js, JavaScript, GitHub API, Gemini AI, Recharts

- Analyzed GitHub repositories using repository-level technology evidence to generate structured developer skill assessments and experience-level classifications.
- Integrated GitHub API and Gemini AI into assessment workflows covering skill scoring, technical evaluations, role-fit insights, and hiring recommendations.
- Built a recruiter-facing analytics dashboard with interactive skill visualizations and downloadable PDF reports, transforming repository data into structured candidate profiles.

EDUCATION

United School of Business Management

Bhubaneswar, Odisha

Master of Computer Applications (MCA) — CGPA: 8.3

2024 – 2026

Bhadrak Autonomous College

Bhadrak, Odisha

Bachelor of Science (B.Sc.) in PCM — CGPA: 7.43

2020 – 2023

CERTIFICATIONS

Cloud Computing – NPTEL; Introduction to Generative AI – Google Cloud (Coursera)
